- Wrote code for business use cases and addressed bugs.
- Collaborated with the team and QA for bug resolution.
- Designed Laravel-based APIs and provided regular progress reports.

Global Consulting, State Life Society Lahore - *Software Engineer*

Sep 2020 - March 2021

Responsibilities :

- Designing and implementing web-based applications with Laravel, MySQL, and the Bootstrap framework.
- Deploying and monitoring Laravel applications to ensure seamless functionality.
- Developing front-end applications using HTML, CSS, and Bootstrap.
- Troubleshooting and resolving technical issues at different complexity levels.
- Crafting reusable, testable, and efficient code for enhanced application performance.
- Managing data interchange between servers and users.
- Integrating user-facing elements with server-side logic for optimal functionality and responsiveness.

PROFESSIONAL PROJECTS

Mobocheck Check

Details: The system is engineered for mobile phone diagnostics, catering to both iPhone and Android devices. It facilitates comprehensive checks on phone sensors, touch functionality, cameras, audio, etc. Additionally, a desktop app has been created using Electron.js.

Portal URL: <https://cartlowcheck.com/>

Cartlow

Details: Cartlow, a prominent re-commerce platform, focuses on the sale of diverse electronic items and other products. As an innovative reseller platform, Cartlow ensures customers can acquire high-quality, pre-owned goods at budget-friendly prices. Through its commitment to sustainability and affordability, Cartlow transforms the shopping experience, making premium products accessible to a wider audience.

Portal URL: <https://cartlow.com/>

Cemetery Manager System

Detail: Electronic record keeping burial and cremation records. Electronic archive of historical burial records. Integrated payment method and booking flow.

Admin Portal URL: <http://gsmc.cemeterys.us/>

Sea Scape Properties

Detail: Sea Scape Properties, situated in Wrightsville Beach, NC, is a property management company. The project's main challenge involved seamlessly integrating the WordPress theme with third-party APIs, tracking, and mapping data to align with the WordPress structure. Additionally, custom plugins were developed, and the theme and functionality were tailored to meet the specific requirements of the client.

URL: <https://seascapevacationhomes.com/>

Ideawake

Detail: I am currently engaged with Ideawake, a platform facilitating innovation programs from idea inception to measured outcomes. My focus involves working on its WordPress site, specifically addressing challenges such as integrating third-party APIs, data tracking, and mapping within the WordPress structure. Additionally, I have developed

custom plugins and tailored themes and functionalities to align with client requirements.

User Portal URL: <https://www.ideawake.com/>

Auto Hive

Detail: Developing an admin panel facilitating the buying and selling of car spare parts. Crafting an appealing UI design and seamlessly integrating diverse payment methods for enhanced user experience and efficient transactions.

eShop

Detail: Developed and deployed an e-commerce platform, successfully integrating **Momo payment API and SMS API** functionalities for seamless transactions and enhanced user communication.
